[freeScoreBoard Version 10](#)
[all Versions](#)

A Linux Version for manual installation (.tar.gz) can be found in all Versions.

[Graphic view of the tournament systems](#)

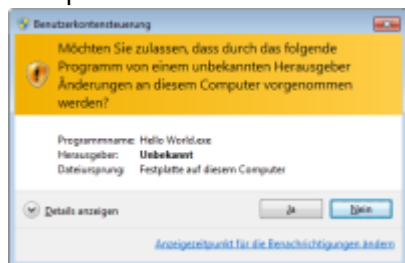

Remark:

freeScoreBoard ist completely free.

If you have payed money for it, you are a victim of a defrauder.

Important:

A certificate to sign code costs around 100 Euro each year. Therefore I do not have such a certificate. So, Windows displays a warning message when you download the setup and again when you start the setup:

Just continue with "yes".
