Tab Display control

Box „active tournament“:

Here is the name of the active tournament displayed. As long as no tournament is active, the program is in mode “free match”. In this case “free match” is displayed. Tournaments can be activated on the tab tournaments.

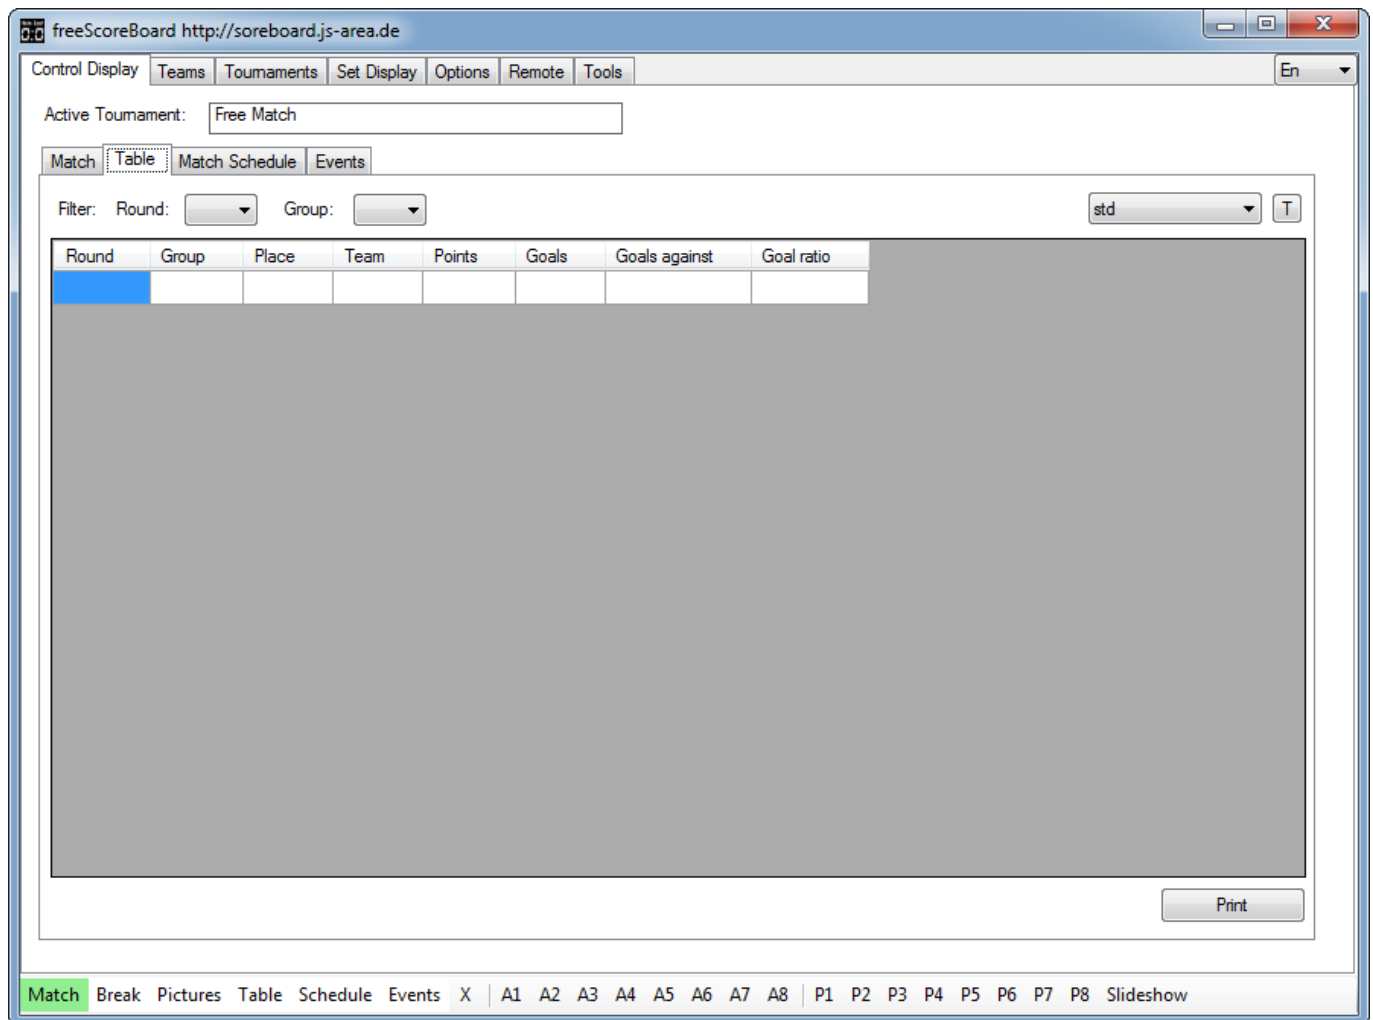

All other controls are again splitted into sub tabs.

Sub tab „match“:

sub tab „Match“

Sub tab „table“:

This tab can only be used for tournaments.

Filter:

If a tournament does have several rounds with several groups, then each group has its own ranking. Here the round and group can be filtered to see just the group or round where the user is interested in.

Combo box „std“:

The table can be customized. Here you can select a pre-defined table layout.

button T:

This button opens a dialog where new table layouts can be defined. Columns can be hidden and the column order can be changed.

Button print:

A dialog is displayed to print this table.

The combo box, the customizing dialog and the print function works same for the next two sub tabs.

General:

The filter- and layout-functionality are also used if a table is displayed on the score board.

Sub tab „match schedule“:

This tab can only be used for tournaments.

Filter:

If a tournament does have several rounds with several groups, then each group has its own ranking. Here the round and group can be filtered to see just the group or round where the user is interested in. In addition you can filter by the match status:

Match Status:

Team 2 Goal: 00 - Match not defined
01 - Match partly defined
02 - Match defined
03 - Match closed
04 - Match closed (both not appeared)

match status:

- 0 - match undefined → opponent not defined
- 1 - match partially defined → first team defined
- 2 - match defined → both teams defined; match is open
- 3 - match finalized
- 4 - match finalized (both teams not started)

Added functionality:

Re-Open match:

If a match was closed by accident, you can here set back the status. This can be done by a right click to the related match. This can only be done if the actual round is not closed.

Enter match result:

The match control can handle only one match. If your tournament forsees paralell matches, you can enter the result of the paralell match here manually by click the match with the right mouse button.

RE-schedule matches:

Some times a tournament gets delays or a match must be skiped . In this case you can re-schedulke the tournament. Just select the metches in the table and click the clock below the table.

General:

The filter- and layout-functionality are also used if a table is displayed on the score board.

Sub tab „events“:

Filter:

Here you can filter by event type. So you can display just goals for example.

General:

The filter- and layout-functionality are also used if a table is displayed on the score board. Events for mode „free match“ can be deleted on the tab „tools“.
