Remote Control App

Many program functionality is very complex. Therefore the App is only able to control the match relotly. The only function for tourmanents is to set the next machth. In this case the previous match is automatically set to finished.

The App runs on all Windows PC's / Tablets with net framework 4.0. The user interface is optimizen for touch control and contains mainly the functionality of the tab "Display Control".

To remote control the the main program both PC's must be in the same network. When the remote / server functionality is used the first time a security message of the Windows fire wall is displayed. There the newtork communication must be allowed. If you are using a different security tool like Symantec, Kaspersky or similar, you may have to allow the network kommunikation in this tool.

Tab Connection

„Server IP“:

IP address of the pc where the main program is running. The IP adresse is displayed in the status field of the main program as soon as the server is started.

„Port“:

The Port must be identically to the port of the main program.

Textbox:

Here a kind of communication log is displayed.

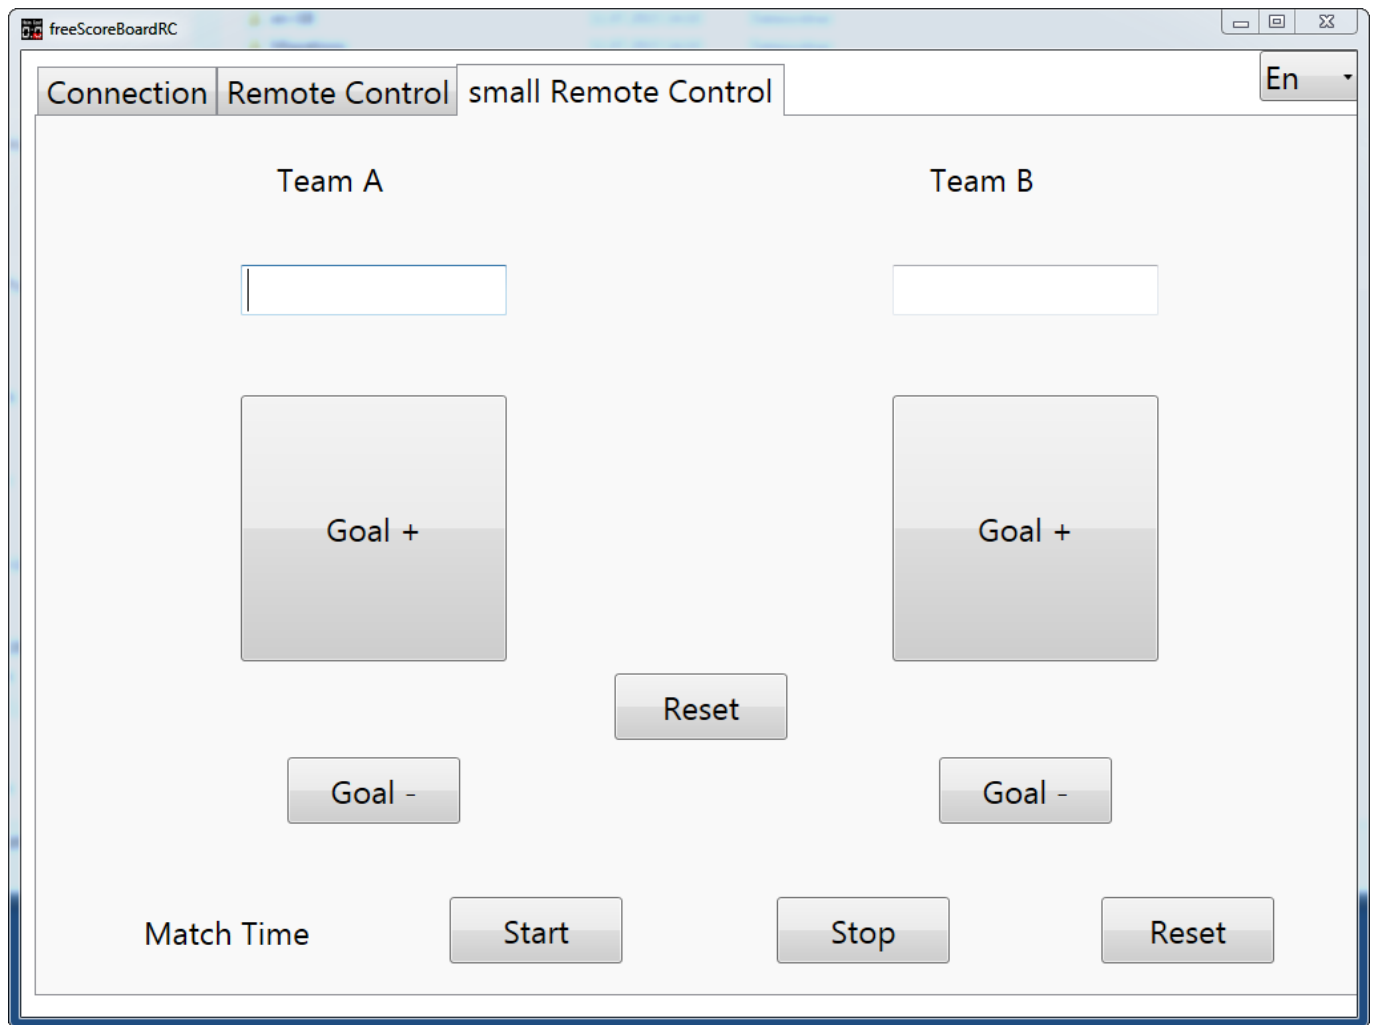

Tab Remote Control

The screenshot shows the 'freeScoreBoardRC' application window with the 'Remote Control' tab selected. The interface includes a title bar with standard window controls and a tab bar with 'Connection', 'Remote Control', and 'small Remote Control'. A dropdown menu on the right shows 'En'. The main area contains a blue button at the top labeled 'end actual match / take over next match'. Below this, there are two columns for 'Team A' and 'Team B', each with a text input field. Under Team A, there are buttons for 'Goal +', 'Foul +', 'Goal -', and 'Foul -'. Under Team B, there are buttons for 'Goal +', 'Foul +', 'Goal -', and 'Foul -'. To the right of these are 'Reset' buttons. Further down, there are 'Match Time' and 'Break Time' labels, followed by 'Start' and 'Stop' buttons for each, and 'Reset' buttons. Below these are 'Match Part' labels, followed by '+' and '-' buttons. At the bottom, there are buttons for 'Match', 'Break', 'Pictures', 'Table', 'Schedule', and 'Events'. The bottom section contains two rows of buttons labeled A1 through A8 and P1 through P8.

The buttons on this tab does have the same finctionality like the buttons in the main program on the tab disply control and the contlol ribbon. In reson of a one way communication no dynamic content can be displayed here. Therefor this remote app contains no preview, timers, combination fields, ...

Team names must be entered manually. By pressing enter the name is transferred to the main program. Team name are only excepted if no tournament is active on the maoin program.

Tab small Remote Control

Depending on your scenario less functionality is required. Therefore this tab contains a lean user interface.
